

GLAS V8

The GLAS V 8 is a comfortable grand-touring class coupé seating four persons. Even the rear seats are as comfortable as the driver's. The technical qualities match in every respect the outward impression of a frankly luxurious car, the harmonious interior appointments of which leave nothing to be desired. The motor is capable of 160 HP without exertion.

It affords the GLAS 3000 V 8 Coupé with a genuine top speed of 200 km/h.

The acceleration meets the demands of the city driver, and is of unusual pleasure for the sportsman: 0—100 km/h in 9 seconds.

The chassis is built to match the performance:

Independent front suspension: low friction coil spring, inclined trailing-arms.

Rear suspension: De-Dion axle.

Hydromatic self-levelling spring shock absorber units: Travel available at any load for constant ride-comfort. Increased braking power and lighter steering with Servo-units.

Technical Specifications:

Length/width/height unloaded: 181.1"/68.9"/54.3"

Weight with full tank: 2976.8 lbs.

Load carrying capacity: 992 lbs.

Permissible load on rear axle: 2094 lbs.

Permissible trailer weight, without brakes: 1543 lbs.,

with brakes: 3969 lbs. Carrying capacity of roof: 165 lbs.

Luggage compartment: 575 liter.

Piston displacement: 2982 ccm. Performance: 160 HP/5100 r.p.m.

Maximum torque: 24 metres kilogram/3500—4200 r.p.m.

Normal petrol consumption: 12 l/100 km at 110 km/h.

The GLAS V 8 can also be delivered with a 2.6 l motor (150 HP)

Design and Appointments subject to modification. This reservation is made in the interest of continued technical development.
